

# Your requirements are individual. So is the “swopper”.

Nobody has a “standard” body and each person has their own special requirements for sitting. That is why the “swopper” comes in many different function and design versions and you can optimally adjust each “swopper” for seat height, sideways movement and your weight.

Overleaf is a brief overview of the many different “swopper” versions available. Detailed information is available at [www.swopper.de](http://www.swopper.de) > [Products](#) > [Configurator](#) or at your authorised aeris dealer.

## Technical Data

### Versions:

“swopper” STANDARD  
“swopper” CLASSIC
